Tile Inc. would like to take this time to thank our valued customers. Every month we spend time mailing, calling and emailing customers and ask the same question over and over: "When can we expect payment on our net 30 terms?" In all the hustle of collecting payments, Tile Inc. would like to give thanks this month to those valued customers who continually pay their bills "on time" without additional notice. We would also like to thank you and your company for saving us the extra time it takes to give additional notice. We are able to put forth the time saved into customer service and running our business as you do.

Lastly, the staff here at Tile Inc. would also like to know if there is anything else we can do to **earn** more of your business? Please contact any one of us here at the store and let us know how we can help.

THANK YOU!

Tile Inc. Staff

### TECHNICAL INFORMATION RESOURCE

A great resource to commonly asked tile installation questions is the website: [www.tileusa.com](http://www.tileusa.com). This is the website for the Tile Council of North America (TCNA). There is a link for frequently asked technical questions. The topics range from when to use grout to cleavage membranes to steam rooms. If for some reason you still have questions about the tile installation you are working on, please give your friends at Tile Inc. a call!
